

Sponsors, Exhibitors Support NRA and the Industry

Education is imperative to the advancement and survival of any industry and company. For 76 years, the National Renderers Association's (NRA's) annual convention has provided a forum for renderers to educate themselves and find solutions to the challenges facing their industry. The convention has also provided renderers a chance to meet with industry suppliers to learn about the latest technology and services available.

Each year, the NRA convention benefits from the large number of dedicated companies that sponsor or exhibit. Those who committed to further educating the industry at this year's NRA convention in San Francisco, CA, were invited to provide a brief summary of the company and its products and/or services. Following is an alphabetical guide to this year's NRA convention sponsors and exhibitors who responded to the invitation by press time.

AC Corporation

(336) 273-4472

www.accorporation.com

AC Corporation has been providing the rendering industry with quality equipment with a focus on air pollution control for over 35 years. Every project is designed to meet the specific needs of the facility, whether it is a single piece of equipment or a turn-key installation.

Experienced craftsmen set AC Corporation apart and are the backbone of the company. A staff of engineers and project managers can handle any rendering project from the smallest duct jobs to complete plant design and installation. AC Corporation personnel look forward to being able to say thank you to everyone in attendance at this year's NRA convention tabletop exhibit in San Francisco, CA.

AE Resources Group, Inc.

(972) 672-9146

www.aerginc.com

AE Resources Group provides the following design/build services: anaerobic lagoon design and construction, biogas recovery system design, hydrogen sulfide scrubber system, permitting and regulatory interaction, and system installation and start-up.

No funding available for a biogas recovery project? AE Resources can help by paying for all capital improvements, selling the biogas to its customer at a reduced price, and the customer will own the system by the end of the term.

Alloy Hardfacing and Engineering Co., Inc.

(952) 492-5569

www.alloyhardfacing.com

Alloy Hardfacing and Engineering has been servicing the rendering industry since 1952 and has attended the national convention since the early 1960s. They will be featuring rendering equipment (batch and continuous), feather processing equipment, raw product pumps, and wastewater solutions at the convention's tabletop exhibit.

Alloy designs, builds, installs, and commissions various rendering projects domestically and abroad.

American Proteins, Inc.

(770) 886-2250

www.americanproteins.com

American Proteins, Inc., was established in 1949 to serve the growing poultry industry in Georgia. Today they operate the world's largest protein and lipid conversion operation in the world.

American Proteins processes over 5.2 billion pounds of raw material per year into 380,000 tons of finished high-quality products, including pet grade poultry meal, pet grade poultry fat, chicken meal fat, refined pet grade poultry meal, chicken meal, feed grade poultry meal, feed grade fat, and feather meal.

Anco-Eaglin, Inc.

(336) 855-7800

www.ancoeaglin.com

Anco equipment has been providing solutions to the rendering industry since 1902. To further expand their capabilities, Anco partnered with Redox, a European leader in wastewater treatment that specializes in complete wastewater treatment plants, non-chemical treatment, sludge fat removal, and mechanical dewatering systems.

With Anco's major growth and sales of its "sure plate" continuous cooker, a design that includes many state-of-the-art technologies, the company broke ground on a new 65,000-square-foot manufacturing facility located on a 10-acre site in High Point, NC. This new space will allow Anco to increase current manufacturing capacities and meet increased demands.

See ad on page 31.

Baker Commodities, Inc.

(323) 268-2801

www.bakercommodities.com

Baker Commodities wishes everyone to have a great time at the convention!

See ad on back cover.

BDI – BioDiesel International

(43) 316 4009 100

www.bdi-biodiesel.com

BDI–BioDiesel International is one of the world's leading suppliers of complete biodiesel production plants. The services the company provides include plant engineering, construction, and start-up as well as subsequent after-sales service.

BDI has had in-depth experience with the construction of biodiesel plants and owns an extensive patent portfolio that has resulted from its in-house research and development activities. The company considers itself to be among the leading international technology suppliers on the market for the production of multi-feedstock plants that can manufacture biodiesel on the basis of different raw materials, such as vegetable oils, waste edible oils, and animal fats.

See ad page 3.

Birmingham Hide & Tallow Co., Inc.

(205) 252-1197

www.bhtonline.com

In the late 1800s, a small wholesaler of hides, furs, and wool opened in Birmingham, AL. From that humble beginning, NRA member Birmingham Hide & Tallow (BHT) Co., Inc., has evolved into a leader in the rendering industry. The Vickers family of Lebanon, TN, obtained ownership of the business in the mid-1930s. A member of the Vickers' family has managed the business ever since. Today, BHT provides rendering services, waste cooking oil removal, and grease trap services for customers throughout the Southeast.

Bolton & Menk, Inc.

(515) 233-6100

www.bolton-menk.com

Bolton & Menk, Inc., provides environmental engineering services to meatpacking, rendering, dairy, and food processing industries throughout North America. The company was founded in 1949, is employee owned, and has over 250 professionals and support staff.

Bolton & Menk provides the following services to the rendering industry: wastewater treatment studies and facility design, permit applications and negotiations, technical support for defense of regulatory enforcement actions, city treatment agreement and user rate negotiation, operations assistance, environmental audits, and waste reduction studies. The company is a long-time active member in the NRA, Fats and Proteins Research Foundation, and the American Meat Institute Environmental Committee.

Brown Industrial, Inc.

(937) 693-3838

www.brownindustrial.com

Brown Industrial is a third generation company that has been specializing in mobile equipment for the rendering industry for over 50 years. The WaBo line includes container style grease units, fat and bone bucket units, barrel grease units, dead stock units, and barrel bodies. WaBo units provide standard bodies and options, as well as custom applications.

Over the past nine years, Brown Industrial has continually updated its shop and equipment to allow them to manufacture the highest quality units available. The company appreciates the support from the rendering community through the years, and looks forward to serving the industry into the future.

Centrifuge Chicago Corporation

(866) 346-6800

www.centrifugechicago.com

Centrifuge Chicago Corporation was formed for the specific purpose of rebuilding decanter and disc stack centrifuges. They specialize in rebuilding of and replacement parts for many high-speed design centrifuges made by manufacturers such as Sharples/Alfa Laval, Westfalia, Humboldt, and Bird.

At their facility in Hammond, IN, Centrifuge Chicago has the capability to rebuild complete decanters, rotating assemblies, gearboxes, and all component parts. They are eager to show the advantages their company can offer in quality and price. A six-month warranty on all parts and labor is included. Since the company's inception, Centrifuge Chicago has sponsored and supported the renderers and the constantly changing issues they face.

Centrisys Corporation

(209) 304-2200

www.centrifuge-systems.com

Centrisys Corporation is the only U.S. manufacturer of high performance decanter centrifuges for two- and three-way separations and is quickly becoming a top choice among meat and poultry processors and renderers. Applications include three-way separation of dissolved air flotation skimmings, yellow grease and tallow clarification, and wastewater sludge dewatering. Centrisys also offers high-speed vertical machines for clarification and separation duties.

Along with top-quality American-made decanters, Centrisys offers full rebuild services for customers with decanter and disc-type centrifuges from other manufacturers including Alfa Laval, Sharples, Westfalia, and Bird. Stop by the tabletop exhibit at NRA's 76th convention in San Francisco.

See ad on page 35.

ChemTreat, Inc.

(804) 935-2000

www.chemtreat.com

ChemTreat, Inc., is a growing specialty chemical company dedicated solely to industrial water treatment. They have over 600 associates working throughout North and South America, the Caribbean, and some areas of the Asia/Pacific regions. Their entrepreneurial spirit not only helps drive the company's success, but also carries over into their customers' facilities. ChemTreat helps their customers save millions of dollars every year, enabling them to achieve unparalleled growth in the water treatment industry.

Continued on page 14

Clean Water Technology, Inc.

(310) 380 4648

www.cleanwatertech.com

Clean Water Technology (CWT), innovators of the GEM system, an advanced wastewater treatment technology, has been helping renderers remove total suspended solids, chemical oxygen demand/biological oxygen demand, and fats, oils, and grease. Get in compliance and increase efficiency with the GEM system due to high contaminant removal rates, reduction in surcharges, sludge hauling, chemical dosing, and physical footprint. Without any capital expenditures, the GEM system can easily adapt to flow and solids loading, making it the most sustainable system available.

Dissolved air flotation (DAF) out of compliance and can't keep up with flow or loadings? CWT will retrofit old DAF with GEM technology.

De Smet Rosedowns

44 (0) 1482 329864

www.rosedowns.co.uk

De Smet Rosedowns is probably the oldest engineering company in the United Kingdom, founded in 1777. Situated in Hull, once the crushing center of the world, the company became involved in the oil and cattle feed industry in the early 1800s.

De Smet Rosedowns entered the North American market in the 1950s, first in fish meal and oil extraction, and then rendering in the 1990s, with presses being supplied to two of the largest rendering companies. Following the revolutionary assembly design, it was decided to adapt this to other presses being used in the industry. This design has increased the capacity and allowed presses to operate with a wider selection of rendered materials.

Diversified Laboratories, Inc.

(703) 222-8700

www.diversifiedlaboratories.com

Diversified Laboratories uses a proactive approach to chemical residue screening that ensures their clients market products free from illegal toxic residues. The company is known for value, quality, and service and has been proud to serve the rendering industry for more than 30 years.

Diversified Laboratories is the only independent laboratory in the United States with U.S. Department of Agriculture accreditations for both chlorohydrocarbons and polychlorinated biphenyls (PCBs), has internal quality assurance/quality control practices that exceed regulatory guidelines, has the most comprehensive chlorinated pesticide/PCB and organophosphate screens available, and provides chemical testing of fats and oils used to produce feed ingredients or biodiesel.

DynaEdge

(920) 562-7730

www.dynaedge.net

DynaEdge, a division of Clean Systems, Inc., has been providing cleaning detergents for over 32 years. As a member of the NRA for two years, they are committed to working

as a partner with the rendering industry to improve cleaning results and reduce overall cost to clean vehicles and plant equipment.

For over a decade, DynaEdge has been addressing the issue of environmentally conscious vehicle wash chemicals. BriTec is one of the company's products that is an example of their commitment to creating innovative products that are safe for people, communities, and the environment. Stop by their tabletop exhibit to discuss how they can help your operation shine.

Energy Management Resources

(816) 883-1018

rrogers@emr-energy.com

Energy Management Resources (EMR) provides energy advisory, logistics, and procurement solutions to clients throughout North America. EMR manages over \$1 billion per year of natural gas and electricity for clients that include several rendering companies. That rendering experience uniquely positions EMR to understand the alternate fuel implications of rendering operations.

As a privately owned company, EMR's advice is completely unbiased by any corporate or utility entanglements, assuring comprehensive, independent, and client-focused solutions. EMR's energy experience in risk management, market analysis, strategic sourcing, and data management delivers an unparalleled level of expertise in energy procurement.

Frontline International, Inc.

(330) 861-1100

www.frontlineii.com

While footprint and facility requirements can vary from place to place, the need to manage valuable cooking oil resources remains constant. At Frontline, their OilCare waste oil, fresh oil, and filtration products are engineered, manufactured, and distributed specifically for high performance, reliable cooking oil management. For the company, it means employing the finest materials and workmanship in accordance with stringent quality guidelines, and ensuring installation and support consistency through service centers around the world.

For thousands of food service customer locations, it means improved monitoring and safer handling of cooking oil every day, from a comprehensive range of system configurations, intuitive designs, and advanced features.

GEA Westfalia Separator

(201) 767-3900

www.wsus.com

GEA Westfalia Separator is a world leader in providing mechanical separating equipment to the rendering industry. The company offers a wide range of decanters and separators appropriate for processing both edible and inedible fats. Of particular interest is their SE 125, a relatively new separator that provides very high g-forces and reduces fines to as low as .03 percent. No pre- or post-processing equipment is required.

See ad on page 9.

Continued on page 16

Green Fuels America

(866) 996-6130 www.greenfuelsamerica.com

Green Fuels America, located in Sparks, NV, a subsidiary of Green Fuels, Ltd., of England, is introducing its 5,000 gallon per day FuelMatic biodiesel processor in the U.S. market. There are 18 of these skid-mounted plants operating in Europe. The standard transesterification/dry wash module makes biodiesel from waste vegetable oil and with the pre-treat module, yellow grease up to 15 percent free fatty acid can be processed. The machine is sized for renderers who want to make biodiesel on-site using their feedstocks. Visit Green Fuels during the NRA's convention tabletop exhibit, or call them for a private meeting.

Griffin Industries

(859) 781-2010 www.griffinind.com

Griffin Industries is a family-owned and operated agribusiness that has been in the rendering business since 1943 with operations in the Midwest, Atlantic coast, Southwest, and Southeast regions of the United States. A full line of animal proteins, oils, hides and skins, organic fertilizers, and biodiesel and renewal fuels are marketed both domestically and internationally. All products are produced under hazard analysis and critical control point programs and closely monitored for high quality.

Griffin personnel have been involved in NRA and with its staff for many years, have participated in government issues affecting the rendering industry, and are committed to serving society in its need for recycling raw materials into quality products.

Haarslev, Inc.

(816) 799-0808 www.haarslev.com

Haarslev Industries, founded as Haarslev Machine Factory in 1973, specializes in rendering equipment. In order to explore new markets, Haarslev has acquired Svaertek, Atlas-Stord, and most recently Tremesa. Together these companies represent over 100 years of experience in the industry.

Haarslev specializes in mechanical and thermal dewatering for various industries and is recognized as a world leader in designing and installing equipment for the rendering and fish meal industries.

Working closely with its customers, Haarslev focuses on energy efficiency, environmental protection, and reliability, be it a single piece of equipment or a complete plant. Most equipment is manufactured in its own facilities, allowing the company to achieve the high quality customers have come to expect.

See ad on page 1.

Hurley Brokerage, Inc.

(708) 361-8823 bhurley@hurleybrokerage.com

Hurley Brokerage, Inc., (HBI) of Palos Heights, IL, provides sales representation to multiple NRA members in the rendering and packer-rendering industry. HBI and its predecessor, Hurley-Williams Brokerage, have been associate members of the NRA since 1969. Dealing mainly in tallow and grease, HBI trades with consumers in the oleochemical, biofuels, feed, and export industries. Bill Hurley is HBI's president.

Jenkins Centrifuge Co., LLC

(800) 635-1431 www.jenkinscentrifuge.com

Jenkins Centrifuge Co., LLC, was introduced to the rendering industry in 1972 when the company rebuilt a centrifuge for a local hide processing plant. Since that time Jenkins Centrifuge has continued to specialize in servicing the rendering industry and has rebuilt thousands of centrifuges. They have 24 men trained in the art of rebuilding centrifuges, and a company goal of giving their customers a quality rebuild at a competitive cost. Jenkins can also manufacture various size new machines at the customer's request. The company thanks the industry for their continued business.

Kemin Nutrinsurance

(877) 890-1462 www.kemin.com

Kemin Nutrinsurance, a division of Kemin Industries, is exclusively focused on providing innovative solutions to the global pet food, rendering, and pet supplements industries.

Kemin understands how a product works at the molecular level. The company's customer laboratory service technicians provide the most comprehensive laboratory analysis and support in the industry. They use superior chemistry to uncover the best ways to help maintain the quality of rendered animal proteins and fats to deliver nutritional solutions to pets. Kemin also offers equipment guidance and services to maximize the efficacy of its products.

See ad on page 2.

Martin Sprocket and Gear, Inc.

(817) 258-3000 www.martinsprocket.com

Martin SPROCKET & GEAR, INC. After nearly 60 years in business, Martin

Sprocket and Gear has become one of the nation's leading manufacturers, offering a comprehensive product line that provides a range of quality power transmission components, bulk material handling products, and industrial hand tools. Screw conveyors, flat bottom drags, vertical screw elevators, bucket elevators, and conveyor pulleys are just some of the bulk material handling products the company manufactures.

Martin is committed to providing stock, alterations, and made-to-order products. Stock and altered items are mostly available same or next day. Made-to-orders can be processed in mere days. All this is backed by a nationwide network of Martin sales and manufacturing facilities.

See ad page 29.

Onken, Inc.

(309) 562-7271

www.onkens.net

For 25 years, Onken, Inc., has offered innovative products to the rendering industry and 2009 is no exception. New this year is the company's "theft-proof lid" for a standard 300 gallon grease bin. With a design that allows it to be pumped or dumped without removing the lid from the bin, it's the answer to the industry's grease theft problem.

Additionally, Onken has partnered with Rotek Plastic of Canada as their exclusive distributor of plastic grease bins in the United States.

See ad on page 15.

Redwood Metal Works

(888) 644-2893

www.fuillc.com

In 2008, Redwood Metal Works acquired a new line of equipment. Their Artex line of spreaders can handle dewatered sludge and bio-solids for land applications that come from wastewater treatment operations.

Redwood Metal Works builds both steel and aluminum boxes and trailers for handling the various types of materials for the rendering industry. The aluminum cleans up easier than steel trailers, does not rust, and does not need painting. The smooth wall panel provides lower wind resistance for improved fuel efficiency while the aluminum panels allow full strength with greater payload.

See ad on page 33.

Rothsay

(519) 780-3342

www.rothsay.ca

Rothsay is one of Canada's largest rendering companies, providing service in seven out of the 10 provinces and operating six rendering facilities and one biodiesel facility. The company's operations consist of edible, prohibited, and non-prohibited rendering as well as waste cooking oil processing.

The biodiesel facility is dedicated to the transformation of animal fats and oils and was the first commercial-scale biodiesel facility in Canada. Products produced are biodiesel, pork meal, poultry meal, chicken meal, feather meal, blood meal, meat and bone meal, pork fat, poultry fat, bleachable fancy tallow, yellow grease, blended feed fats, edible lard, tallow, and shortening.

Sanimax, Inc.

(514) 643-3391

www.sanimax.com

Sanimax is North America's leading "bio-return" company with two dozen locations in Canada, the United States, and Mexico. The company's roots lie in rendering. More than a century later, rendering continues to be a central part of Sanimax's business, but the company has also taken the underlying philosophy of rendering – reclaiming material, renewing it, and returning it to the market – and has extended it in new directions.

Sanimax offers a range of by-product collection services, specialized maintenance for the restaurant industry, is a leading supplier of ingredients for agriculture and animal nutrition, and is a globally respected source for hides and skins.

Scaffidi Commercial Trucks

(715) 344-4100

www.grappletruck.net

Started in 1966, Scaffidi is a family business operating from two locations: Stevens Point, WI, and Tomahawk, WI.

Already the number one manufacturer's representative for Serco loaders worldwide, in 2006 Scaffidi became the North American distributor for Kesla knuckleboom loaders, made in Finland. Kesla loaders are lightweight and offer the longest reach, heaviest lift combination, and the popular z-fold feature, allowing operators to dump a box or trailer without leaving the cab of the truck.

Scaffidi's experienced craftsmen, working with a range of truck-mounted and stationary hydraulic loaders, have found ways for today's dead stock hauler to be safer on the job.

See ad on page 34.

SCP Control, Inc.

(763) 572-8042

info@scpcontrol.com

SCP Control, Inc., is a provider of environmental

consultant services and specializes in the supply of wet scrubbers and components for the collection and treatment by chemical oxidation of odorous vapors for pretreatment of gas prior to thermal oxidation of entrained contaminants.

SCP continues to pursue the development and supply of ozone generation systems for oxidation of chemical contaminants within wet scrubbers. Additionally, the development of wet electrostatic precipitators, for use in conjunction with non-thermal oxidation of contaminate vapors of waste gases, is being pursued.

Separators, Inc.

(800)233-9022

www.separatorsinc.com

Separators, Inc., is a North American leading centrifuge service provider specializing in the remanufacturing of Alfa Laval, Tetra Pak, and Westfalia centrifuge equipment. The company offers a full complement of start-up, maintenance, and repair services and stocks over 10,000 parts with 24/7 availability. In addition to edible and inedible rendering, industries served include dairy, beverage, edible oils, pharmaceutical, biofuels, and industrial fluids.

Southwest Hide Co.

(208) 378-8000

www.southwesthide.com

Southwest Hide Co., headquartered in Boise, ID, is a full-service hide processor and dealer to the rendering industry in the Midwest, Northwest, and western United States as well as western Canada. They have processing plants in Scottsbluff, NE, Bellingham, WA, and Modesto, CA, with sales offices throughout all of Asia, Mexico, Spain, Italy, and Brazil.

Southwest Hide enjoys its many relationships within the rendering industry and its affiliation with the NRA.

Summit Trailer Sales, Inc.

(570) 754-3511

www.summittrailer.com

Summit Trailer Sales, Inc., is a name synonymous with quality manufacturing in the trailer and truck body industry. Producing both aluminum and steel units, the company has been serving the rendering industry for well over 35 years. Founded by Charles Pishock Sr., Summit is now in its second generation of family. Their customers are always supplied with quality and new innovations. Summit is proud to be a part of the rendering family and wants to thank the industry for its business over the years.

The Dupps Company

(937) 855-6555

www.dupps.com

The Dupps Company, nearing its 75th anniversary of service to the protein co-products industry, offers the world's most complete line of rendering systems and machinery including cookers, dryers, screw presses, size reduction machinery, material handling equipment, and evaporator systems. In addition, the Dupps field service team is the largest and most experienced in the industry, providing a staff of full-time technicians who are experts in every aspect of rendering equipment maintenance and repair.

Dupps' engineering and process development experience can handle a client's specific needs, whether its one piece of machinery or an integrated processing facility.

See ads on page 19 and inside back cover.

The Gavilon Group, LLC

(402) 889-4000

www.gavilon.com

The Gavilon Group, LLC, headquartered in Omaha, NE, is a leading provider of essential services in the physical distribution, trading, merchandising, and risk management of grain, feed ingredients, fertilizers, and energy products moving through the global supply chain.

Gavilon has a long history in the rendering business, which began as part of ConAgra's Food Ingredient Merchandising division in the late 1970s. Today, with more than 90 years of combined rendered product experience, the company is an essential partner to both buyers and sellers as a leading shipper of fats, oils, and proteins, and an independent service provider of logistics support worldwide.

Travis Body and Trailer, Inc.

(800) 535-4372

www.travistrailers.com

Travis Body and Trailer, Inc., Houston, TX, has been in business for over 20 years, manufactured more than 11,000 trailers, ranked in the top 30 trailer manufacturers in the United States, and distributes all across the country. They manufacture aluminum dumps, bottom dumps, and live-floor transfer trailers. Travis built its first rendering trailers in the 1980s and early 1990s for Valley Proteins, Hudson Foods, Simmons, Wampler-Longacre, E.A. Miller, Ocean Proteins, and Tyson Foods. Since joining NRA, their customer list has expanded to include Darling, Griffin, Sanimax, American Dehydrated, Gold Kist, John Kuhni Sons, Birmingham Hide and Tallow,

among others. They take pride in customizing their trailers to incorporate the customer's ideas, and to fit their needs.

See ad on page 25.

Troup Environmental Alternatives, LLC

(212) 627-8939

ktroup@troupenviron.com

For odor elimination and indoor air purification, BekZon's biased plasma technology offers a guaranteed solution at a fraction of the cost of other methods of treatment. Sulfides, mercaptans, volatile organic compounds, molds, and bacteria are decomposed by inorganic peroxide oxygen molecules that react with contaminants inside a building to create a healthy work environment. Unlike scrubbers or filters that treat odors outside the contaminated space, BekZon's unique "Bia-Q" process breaks down the pollutants at their source without the use of chemicals or water. As an added benefit for rendering facilities, the biased plasma technology kills airborne pathogens, removes particulates, and reduces corrosion.

Walinga, Inc.

(800) 466-1197

www.walinga.com

Walinga, Inc., manufactures a complete line of rendering collection vehicles. Established in 1954, Walinga has grown to ensure that the customer has access to a comprehensive line of rendering collection vehicles from rear loader trucks to front loader trucks, and from rear loader trailers to bone and blood units. Walinga also offers a complete line of options such as remote control buckets and lift arms, roll tarp covers, blood tanks, solid roofs, and variable bucket designs.

Warren Equipment, Inc.

(800) 752-9469

www.warrentrailers.com

Warren Equipment, Inc. is located in Plant City, FL, and manufactures all types of rendering trailers: dumps, tippers, frame type and frameless, steel and aluminum. They are part of the Warren family of companies started in 1985 in Birmingham, AL, by Russell Warren and now have locations in Texas, Mississippi, Alabama, South Carolina, as well as in Florida. Warren Equipment offers parts, service, and repairs for their rendering trailers at all of these locations.

Warren custom builds their trailers to the customer's needs and specifications.

Wellens & Co., Inc.

(952) 925-4600

wellens.company@earthlink.net

Wellens & Co., Inc., is an agri-business firm based in Minneapolis, MN. Their mission is to provide the best possible service to suppliers and customers by following the company's core values – ethics, leadership, and excellence. Their leadership team has extensive experience in all phases of the feed industry and agriculture, trading a variety of feed ingredients, both nationally and internationally.

Wellens & Co. has been an active member and participant of the NRA since the mid-1960s. This affiliation facilitates a win/win relationship with leaders in the industry. With change accelerating in agri-business, the company remains totally committed to the rendering business. **R**
